Polyethylene

FA3200

Low Density Polyethylene

Description

FA3200 is a non-additivated low density polyethylene homopolymer produced by an autoclave high pressure process. This grade used in blown film production application where it brings outstanding melt strength and bubble stability.

Films made with FA3200 show excellent mechanical performances, very good toughness combined with balanced shrink properties.

CAS-No. 9002-88-4

Applications

FA3200 is recommended for:

Heavy-duty bags
Collation shrink
Shrink film
Construction films

Industrial films
Agricultural films
Bags and pouches
Food packaging

Additives

FA3200 contains no additives.

Physical Properties

Property	Typical Value	Test Method
Data should not be used for specification work		
Density	920 kg/m ³	ISO 1183
Melt Flow Rate (190 °C/2,16 kg)	0,25 g/10min	ISO 1133
Melting temperature (DSC)	110 °C	ISO 11357-3

Film Properties

Film properties are measured on 125 µm film sample produced on a 60 mm W&H extruder with IBC cooling at BUR = 1:3.
MD = machine direction, TD = transverse direction.

Property	Typical Value	Test Method
Data should not be used for specification work		
Dart Drop	500 g	ISO 7765-1
Tensile Strain at Break	MD 450 %	ISO 527-3
Tensile Strain at Break	TD 500 %	ISO 527-3
Tensile Strength	MD 20 MPa	ISO 527-3
Tensile Strength	TD 22 MPa	ISO 527-3
Tensile Modulus	MD 200 MPa	ASTM D 882-A
Tensile Modulus	TD 230 MPa	ASTM D 882-A

Coefficient of friction (Dynamic)

ISO 8295

Storage

FA3200 FA3200 should be stored in dry conditions at temperatures below 50 °C and protected from UV-light. Improper storage can initiate degradation, which results in odour generation and colour changes and can have negative effects on the physical properties of this product. More information on storage is found in the Safety data sheet (SDS) / Product safety information sheet (PSIS) for this product.

Safety

The product is not classified as dangerous.

Please see our "Safety data sheet" / "Product safety information sheet" for details on various aspects of safety, recovery and disposal of the product. For more information, contact your Borealis representative.

Recycling

The product is suitable for recycling using modern methods of shredding and cleaning. In-house production waste should be kept clean to facilitate direct recycling.
